

Please add new claims 10 and 11 as follows:

10. (new) The sampling device according to claim 7, further comprising a controller incorporated in said housing unit for controlling operation timing of said actuators/actuator.

11. (new) A method of sampling blood or body fluid, comprising:

attaching the sampling device according to claim 10 to a subject; and

sequentially driving the sampling devices to sample blood or body fluid from the subject at different times.
